Desert Docks

4-day World Design

Initial Plan

1. Breakdown the document
2. Clarify which are the important elements
3. Determine size/ relevant geometrical lines and shapes
4. Blockout

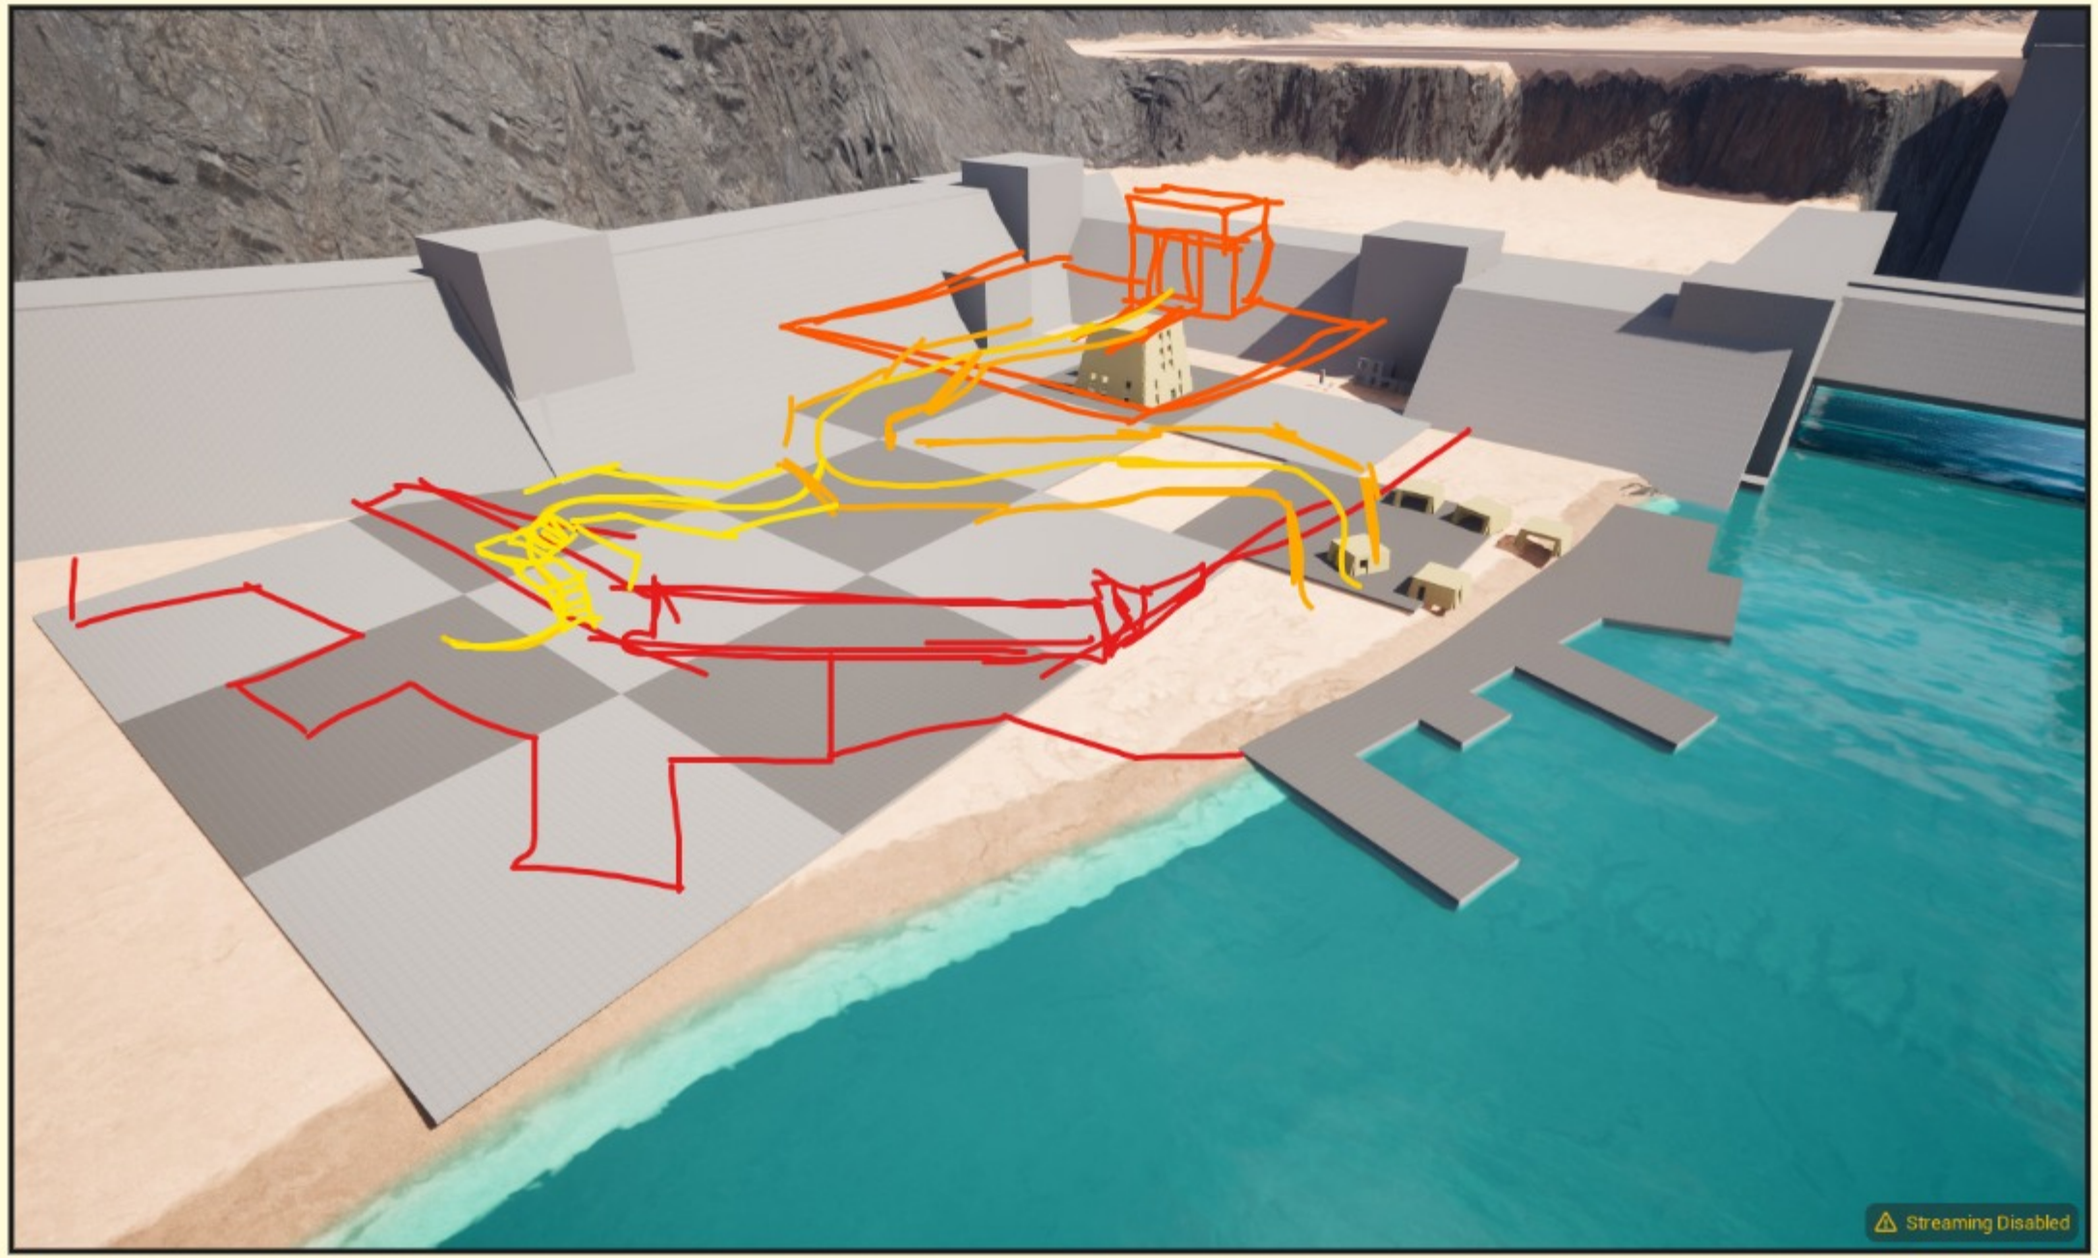
World Design brief

Create a level in Unreal based on the following theme - a Desert, north African inspired, Water adjacent settlement, part of a major, unreachable city. The 3C is that of a First Person template and needs to allow for multiple starting / ending positions with clear and strong Landmarks to guide the player.

The level needs to contain the following:

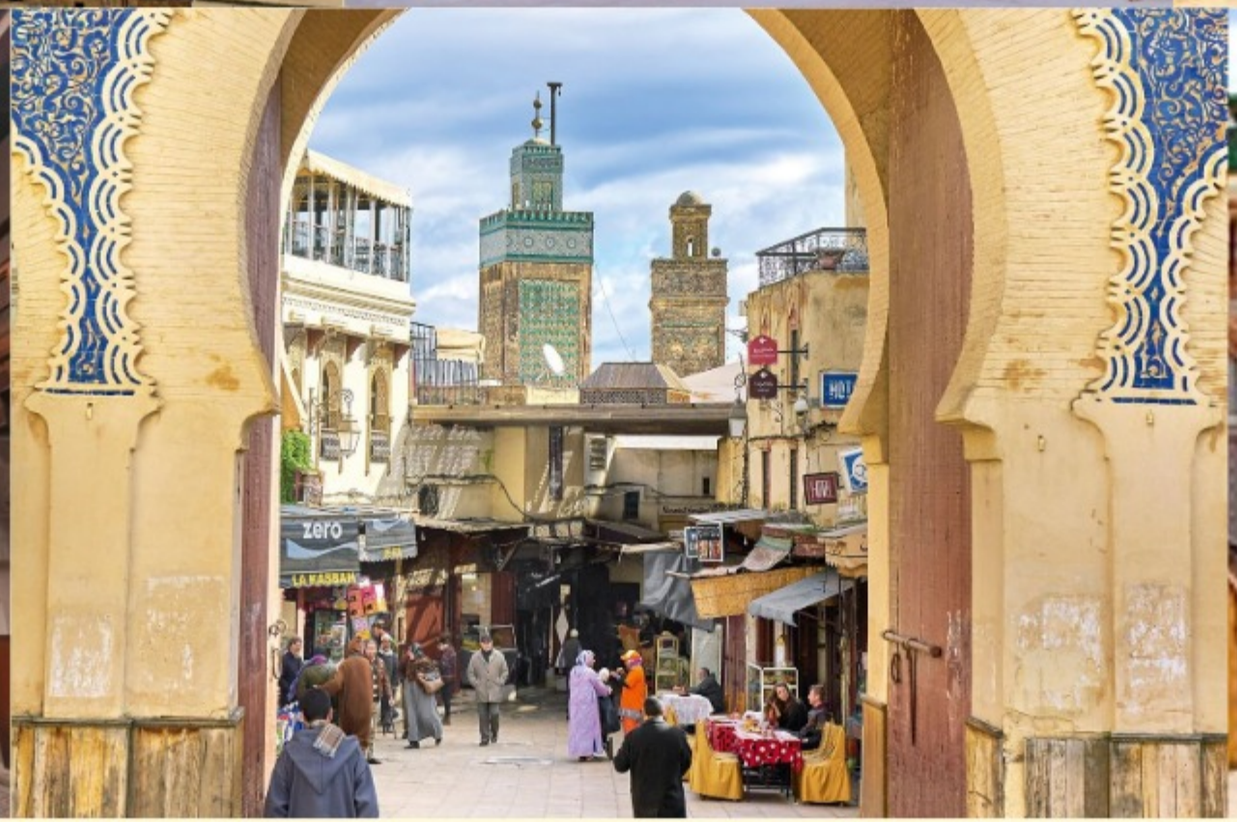
- At least 2 starting positions
- A water-based map edge to allow for easy entrance
- A small settlement with a much larger citadel visible but not accessible
- Clear, massive Landmarks that influence the architecture

Initial 2D planning over basic size blockout



Basic Planning

Morocco research



Final Design

1. 2D Overview
2. Landing Spots
3. Spice Market
4. Bazaar
5. Garrison
