San Francisco Casino

ASTOR CASINO & RESORT

With the recent gambling laws overturned in California (fictional event), allowing for roulette and banking/percentage games played with cards/dice, The Astor Chain of Casinos & Resorts immediately opened for business in San Francisco.

The Astor Casino & Resort is a global chain with properties across the world, offering games and entertainment for all ages. That includes a family side to the casino with a theater for children's shows during the day and headline performances at night. There are multiple popular chain restaurants, a shopping plaza, a swimming pool bar, a movie theater, and off course a massive gambling hall with a variety of games.

The infected patient is another Foundation Space employee, a vault technician with a gambling problem. He rented a room at the Astor for the weekend before anyone realized he was among the infected. He started attacking guests in the hotel first. Homeland Security locked down the hotel and evacuated civilians they determined were uninfected, but they didn't have the resources to eliminate the parasite. They've been waiting for REACT to arrive, but that allowed the parasite to gain a firmer foothold.

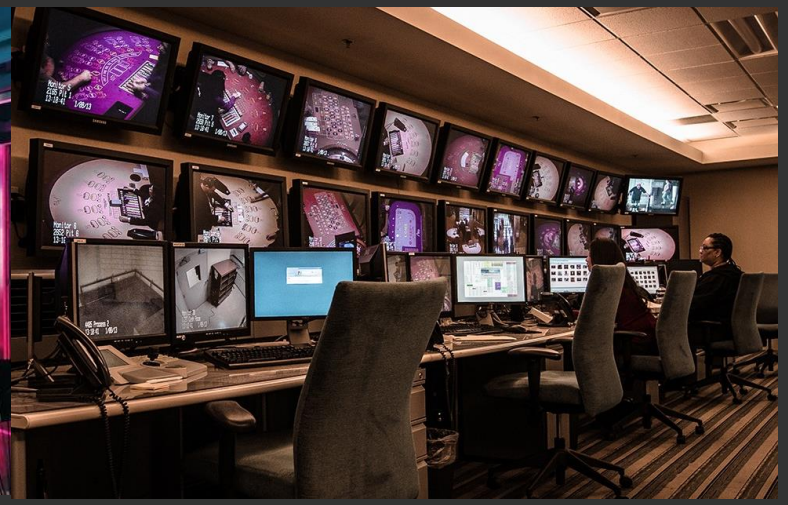
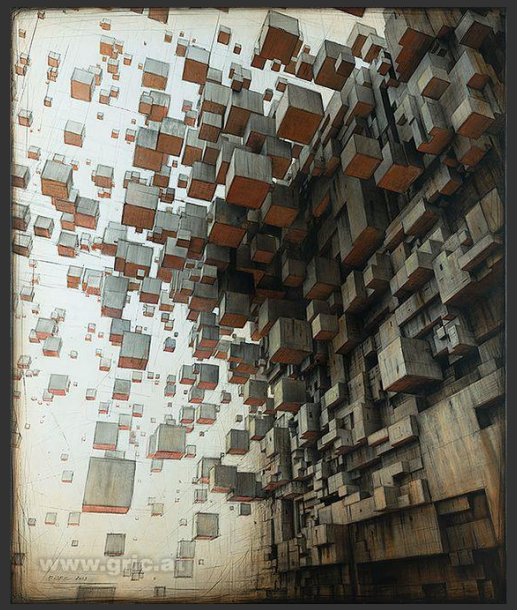
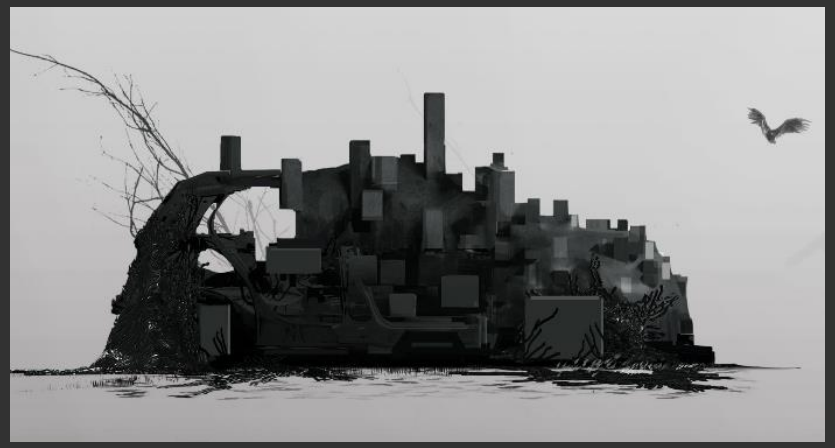
CASINO- The Astor Mood

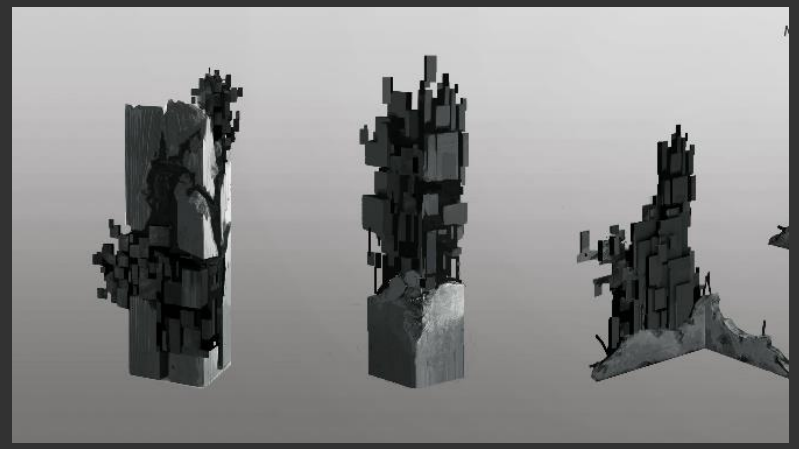


- The Astor is a new casino resort recently opened in SF with a luxurious and modern look.
- A vault technician From the Foundation Space with a gambling problem rented a room at the Astor he was infected.
- Security locked down the hotel and evacuated civilians.

S F - Parasite presence







Low → High

Parasite Infection

Medium

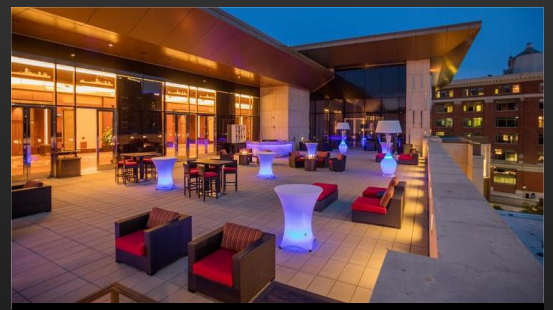
- Shells are becoming common at the territory borders, very often near nests.
- Bigger size, about 3/4m high can be as wide as a room.
- Connecting elements used as anchor points (car to a wall, wall to a wall…).

CASINO - Submap 1: Rooftop

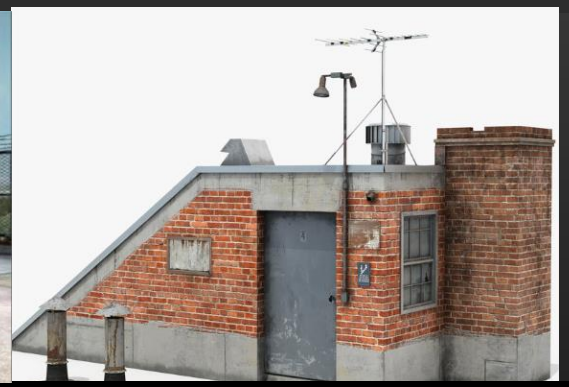
Close	Medium	Long	Verticality	Destruction
20	40	40	No	Low

- We need to keep limited the views on the city
- Destruction will be difficult to implement

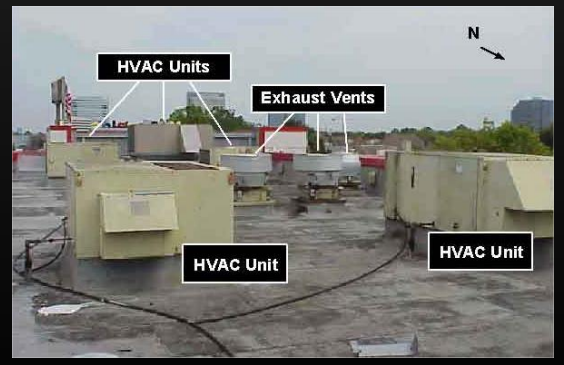
Use mechanical objects for covers
Try to use destructible props as much possible



Addition of bar / restaurant elements
Allow for diversity and destruction



Clear link to airlocks
(one being a smaller single stairs nd one elevator maintenance access with bigger stairs access)



If we need visual skylights
They cannot be accessible
Or seen through by players

Chopper insertion with multiple
Paths / tactical choices for the players

CASINO - Submap 2: Gambling floor

- Poker table - Blackjack - Roulette
- Cashiers - Food Buffet
- Slot machines - Casino Wheel

CASINO - Submap 2: Gambling floor

Close	Medium	Long	Verticality	Destruction
25	60	15	No	Medium

- Need to maximize destruction potential, while having a simple navigation flow
- Maximize destructible props for ease of navigation

We need some inner work areas
To provide some CQB, more
Wall subdivisions for destruction
And connection to security

Avoid large casino areas
And rely on smaller sections, connected through walls etc for destruction

Casinos are very generic in nature
Landmarks are critical

Elevator insertion / Extraction

CASINO - Submap 3: Security / Vault

CASINO - Submap 3: Security / Vault

- Security - Vault - Server
- Office - lockers
- Security Checkpoint

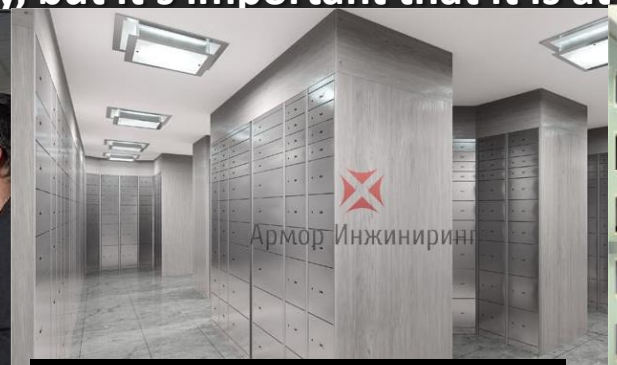
CASINO - Submap 3: Security / Vault

Close	Medium	Long	Verticality	Destruction
40	45	15	No	Medium

- This section has a good mix of close and longer range areas
- Destruction will be harder to implement, thus a lower density, but it's important that it is at the core of the experience

One side of the submap can look
More in line with the casino to help
Orientation

Security area is a strong
landmark



Large vault with Mix of high and
low covers to provide
Good cover / visibility
Subdivision of space is also
good to provide destruction

Insertion with secured elevators

Need some smaller rooms for CQB
& Destruction

Vault is a great landmark

Themed security corridors
With covers

Need different sections leading
To both safehouse in thematics
